SKILLS

Front-End:HTML, CSS, JavaScript, React, DOM, APIs, Web APIs

Back-End: C#, GraphQL, Node.js, Express ,User Authentication, OAuth, Python

Databases: MySQL, MongoDB, PostgreSQL, RESTful APIs

DevOps & Cloud:Docker ,Continuous Integration/Continuous Deployment (CI/CD)

Deployment & Development Tools: Heroku, GitHub , Agile Development

EDUCATION

BRAINSTATION | Diploma, Software Engineering

DEC 2023 - MAR 2024, Vancouver, BC

VOLUNTEERING

Library Champions Project, April 2024

EXPERIENCE

Software Engineer, contractor/consultant | Freelance

MARCH 2024 - PRESENT, VANCOUVER, BC

Full-Stack Developer | E'Mind Tek Inc

NOV 2022 - SEP 2023, VANCOUVER, BC

Projects: CUS

- Designed and developed a security system for a hospital locker containing dangerous medications, requiring employee fingerprint authentication. I built the system to handle card insertion, fingerprint scanning, and synchronization with the fingerprint scanning equipment.

Alouette

- Designed and developed an inventory management system, collaborating with backend developers and conducting thorough testing to ensure stability. Utilized Material UI to enhance the interface, improving operational efficiency by 20% and user experience.

Intermediate Front-End Developer | PayProGlobal

DEC 2021 - FEB 2023, TORONTO, ON

Projects: E-commerce platform

- Built a new payments page using React, Next.js, and GraphQL, resulting in a 30% improvement in load times. Implemented a CI pipeline with Docker to enhance deployment efficiency and developed responsive, accessible web applications, increasing conversion rates by 26% and boosting user engagement

Frontend Developer | Softemy

MARCH 2018 - Dec 2021, KYIV, UKRAINE

- Implemented scalable front-end solutions with React and Redux.
- Collaborated with backend developers to ensure efficient data flow.
- Participated in testing and debugging while supporting customers.

PROJECTS

[CryptoDash](#) | March 2024

- A real-time cryptocurrency dashboard, using React for the UI and Node.js with Express.js for backend services, providing users with up-to-the-minute market data and trends.

[InStock](#) | February 2024

- Project for a Fortune 500 client—an Inventory Management System. The project involved building a scalable,full-stack web application.
